

System Implementations

Is your organization implementing a new system? Are you overwhelmed with your current responsibilities?

Let Driffin Tucker experts assist you in implementing, transitioning and training your team how to best use your new system. Our team has worked extensively with clients during the planning and implementation of new software systems. We will help identify potential pitfalls and issues that are common with system conversions and help implement plans to prevent those issues. In addition, we will identify best practices based on our prior experience, and we will communicate any process improvement suggestions.

Our team can also provide coverage or represent the Accounting and Finance departments in planning, build, and implementation project team meetings so your staff can focus on current job responsibilities. Our level of involvement will be custom tailored to your organization's needs.

Projects we have managed:

- General Ledger
- Accounts Payable
- Materials Management
- Supply Charging
- Charge Description Master
- Refunds
- Cash Posting Reconciliation
